Welcome September and some cooler temperatures! We've got you covered with a few fall tips.

**Blinds** can help influence heat gain and loss. Even exterior shades - installed correctly, can trap heat in outdoor spaces allowing you to enjoy the outdoors deeper into the season.

**Painting** gets tricky in the fall/winter. Cold weather prevents proper application of paint to the point it may flash causing an uneven sheen when it dries or from it drying properly. Paint can indeed be done outside but you'll need to be patient as weather dictates. It is smart to have your exterior painting needs quoted in the fall for completion the following spring when painters are hard to find!

Call on the experts at [All About Blinds](#) and [All About Painting](#) to help inform your decision.
